

Malcolm Glaister

CEO SiriusInsight

After Computer Science at Durham and 9 years in the Royal Navy, including command of a CT Patrol Ship, Malcolm began a career in technology and operations with GE and JPMorgan. Before founding his own FCA-regulated advisory business, he worked in management roles with AIG and Lloyds Banking Group. Malcolm co-founded SiriusInsight with Professor Mischa Dohler, Informatics Chair, Kings College London in 2016.

SiriusInsight is a leading specialist in maritime situational awareness, combining Artificial Intelligence and modern sensor equipment to transform the cost and effectiveness of maritime surveillance globally. Patented AI technology analyses data from remote sensors (ashore, afloat, aerial and satellite) to autonomously detect and classify marine activity, delivering actionable alerts to ensure safety and security at sea. Contracted to UK Home Office since 2019, it delivers product to multiple Government agencies. Other clients include Coastguards and Insurance sector.

Malcolm is a Fellow of the Institute of Securities and Investments, Associate Fellow of the Nautical Institute, member of RUSI and Royal Institute for Navigation. He is an Elder Brother and Trustee at the Trinity House, and supports a number of veteran and maritime charities.

His focus within SCEG is on advancing the application of AI within Maritime and Littoral environments.
